

## Good things are happening...

*Good things are happening at your Co-op.* In August, we began the initial equipment installation for IPTV. The installation has been quite a lengthy process and we are continuing to get the equipment setup and installed. The main system is being housed in our Central Office at the Dahlgren facility.

Our crews are working diligently to get this new service setup and passed along to our members. IPTV is the latest and greatest television technology available in today's market. Besides a high-quality picture and great reliability, IPTV brings with it a multitude of advanced features including Whole Home DVR, High Definition, Pay Per View and the ability to pause/restart live television. The new set-top boxes/receivers will also have the ability to access broadband services like YouTube, Picasa, Metachannel and many others right on your television screen. This service will also include widgets that are interactive applications such as weather, news, sports, stocks and others yet to be announced.

While we progress with the installation and testing of this new service at our office, we will continue to provide more information as it becomes available. If you think you might be interested in this television service in the near future, please let us know. At the initial rollout, the service will be available to members living close to each exchange's central office building. We will work aggressively to install new fiber optic cable and equipment throughout the remaining areas. However, construction planning will be prioritized by those areas who have the most interest. **Good things are happening. We are excited about this service and hope you will be too!**
